

# ABOUT *US*

Ryan International is an India-based Leather Goods Manufacturing Company which is headquartered in the Leather City of India, Kanpur. Spreading around an area about 25,000 sq. ft., Ryan International employs 150 people directly and 300 people indirectly. It is one of the few companies to recognise the importance of quality and we spare no effort to remain on the path where quality is maintained, principles are valued and our valuable customers are satisfied. We feel that a good idea becomes a truly excellent one when you couple it with experienced and talented professionals behind it.

Established in 1992, primarily engaged in manufacturing high quality leather for belts, bags, and equestrian equipment has now taken a leap ahead and expanded into manufacturing bags for leading brands.

Our products are extremely used by patrons owing to their top quality and nominal costs. In addition, we deliver products to our valued clientele at nominal prices, keeping their budgetary limitations in mind.

# MANUFACTURING UNIT

We have our own tannery and almost all our requirement of leather is accomplished from our own tannery. We don't have to rely on suppliers for the leather requirement, thus, outfoxing our rivals by giving us competitive edge over competitors through having exclusive leather and offering timely deliveries. We have accumulated a truly impressive amount of experience throughout the years, years of very hard work. We have reinforced our profession and have made it known as a reliable and efficient enterprise.

On approval of samples, we move to production. We have the capacity to handle both large and small scale production runs. Presently we are having a production capacity of around 5,000 bags and 10,000 small leather accessories per month.

# COMMITMENT TO QUALITY

We believe that quality is of utmost importance to everyone, so we make the selection process a little bit stringent. The selection of raw hides is one of our important processes, because according to us if the input is best, the output will eventually be remarkably exceptional.

Quality must be more than a word. It doesn't belong to one company or one country, it doesn't happen by chance, and it requires constant attention. It's a contract between seller and buyer – an agreement that something is good and worth having. Our greatest enemy is the phrase 'it's good enough'.

Our collection is a fusion of technology and craft skills, which stands out because of their marked personality and strong "handmade" flavor. The collection includes handbags, briefcases, purses, portfolios, for both men and women and other accessories, leaving the natural beauty of live materials is the real strength of the collection.

# OUR STRENGTHS

Our fabrications are programmed to offer our clients the best designs and best quality workmanship. We are able to work with many different materials, animals' skins and hides as buffalo, calf, goat, Napa and others.

We get together with our designers and work out the Paper Model. Subsequently, we oversee the formation of the samplings. We all meet at the production line to view our merchandise prepared to be shipped.

Our strength lies in the fact that we are:

- ▶ obsessed over clean minimalistic designs,
- ▶ inclined towards making our customers happier rather than our profit margins.

RYAN INTERNATIONAL

Our company is at your beck and call ready to follow whatever artistic creation you wish to realize—from start to finish. We will work with whatever materials you suggest, and assist you in seeing through to the dream of your desired creation. We are always inclined to surpass all expectations to go the extra mile for our customers' satisfaction.
